READING PASSAGE 3

*You should spend about 20 minutes on **Questions 27-40**, which are based on Reading Passage 3 below.*

Marketing and mind control

How marketing and advertising appeal to the associative nature of the brain

While there had been a long tradition of giving rings as a commitment to marry, the custom of giving diamond engagement rings was in large part manufactured by one of the most effective marketing campaigns in history. In the early 1900s, diamond sales were declining, posing a serious problem for the company that essentially had control over the diamond market. In 1938, this company hired an advertising agency, which proposed reshaping social attitudes toward diamonds. As well as magazines showing film stars draped in diamonds, the agency arranged for movies to incorporate diamond engagement rings into their plots. The campaign culminated with the slogan: 'A diamond is forever.'

At the time, the approach was unique. Rather than pushing a brand, the objective was to promote diamonds as the symbol of everlasting love. This was achieved by exploiting the associative nature of the brain: associating neurons* activated by the concept of 'love' with neurons that encoded the concept of 'diamonds'. By 1941, diamond sales had increased by 55%.

Advertising comes in many forms, from blatant neon signs to subtly embedded products in movies. In each case, the goal is to mould our habits, desires and opinions. Our visual system is targeted by an avalanche of information on the internet, street posters, billboards and in movie theatres. Our auditory system submits to catchy radio jingles and telemarketers. More surreptitiously, our olfactory system is targeted by variations of vanilla and citrus perfumes aimed at enticing us to linger in a retail outlet.

It is difficult to measure how effective these campaigns are, but as in the 'A diamond is forever' campaign, they can be so successful that they change the fabric of our culture. In the case of bottled water, we are swayed by advertising into paying for something that we can obtain for free. Most people cannot distinguish bottled from tap water, much less between brands of bottled water, which is why you rarely hear of a bottled water company proposing a blind taste test.

---

*neurons: impulse-conducting cells that are the functional units of the nervous system

So why is marketing such an effective mind-control technique? It is interesting to consider whether other animals exhibit anything analogous to humans' susceptibility to advertising. If we provide a lab rat with two types of cereal, it will consume approximately the same amount of each. However, if we put that rat with another rat that spent its day eating just one type, when faced with a choice, our rat will now show a preference for the same type as the other rat was eating. Psychologists call this 'socially transmitted food preference'.

What many regard as the first documented examples of cultural learning in primates started with a clever monkey that lived in a colony of Japanese monkeys on the island of Koshima. She began taking her dirt-covered sweet potatoes to the river to wash them before eating them. Upon seeing this, a few other open-minded monkeys picked up on the idea. Potato washing then spread from monkey to monkey and, over the course of a few years, most monkeys were eating clean potatoes. Humans are clearly not the only animals to engage in imitation and social learning.

Learning by observation can be an extraordinarily valuable brain feature. This is how we learn to communicate and perform motor skills as well as deal with many everyday problems. For example, a newcomer struggling to purchase tickets and navigate the subway system in a foreign city may step back to learn from the people nearby. Humans and other primates exhibit multiple forms of imitative learning and this is called cultural transmission.

A component of advertising relies on the marketer's ability to tap into the brain's propensity for imitation. Anybody who has watched TV knows advertisements are disproportionately populated with attractive, successful-looking individuals. If we are going to imitate someone, we are more inclined to imitate those who appear to be popular and appealing.

Although not all researchers are convinced by the findings, a number of studies indicate that some animals also imitate dominant members of their group. Primatologist Frans de Waal provides anecdotal evidence of preferential imitation among chimpanzees. He noted that in one particular group the dominant male was hurt and was limping as a result. Soon juvenile males of the group started imitating his limp, a form of flattery that would have been unlikely if a non-dominant male had been injured.

Imitation is undoubtedly an invaluable ability, but often our propensity to imitate generalises indiscriminately, leading to poor decisions. When athlete Dick Fosbury revolutionised the high jump by jumping over the bar backward in 1968, imitators obviously copied his jumping style, not his brand of sports shoes. However, today, sportspeople appear in advertisements asking us to buy the laptops or sports drinks that they promote. Rationally, we know these people's success did not depend on these products, so it seems our propensity to purchase products relates more to neural programs that evolved to encourage imitation of those further up the social ladder.

Today, companies engage in stealth marketing campaigns in which people are paid to frequent bars or websites to covertly promote certain products. Companies also perform studies in which they track the eye movements of people viewing displays, and carefully craft names, packages and jingles associated with their products.

While we may like to believe that manipulation on a grand scale would not be possible, that's not to say that advertising is innately harmful. To the contrary, the marketing of products or ideas is essential to human culture. The point is that we should ensure our choices reflect our actual goals and desires, and we must distinguish between the dissemination of information which is for our own good, and our manipulation for the benefit of companies.

Questions 27-31

*Choose the correct letter, **A, B, C** or **D**.*

Write the correct letter in boxes 27-31 on your answer sheet.

27 According to the writer, which marketing technique attempts to make consumers stay in a shop for longer?

A playing appealing music
B emitting pleasant scents
C displaying attractive posters
D making in-store announcements

28 The writer mentions bottled water in order to show that

A consumers buy it because of the fact that it is marketed.
B people purchase it despite the fact that it has no taste.
C marketers need not do taste tests when a campaign is effective.
D tests prove that people cannot differentiate it from tap water.

29 According to the writer, socially transmitted food preference occurs when

A only dominant members of an animal group influence what others eat.
B the same types of animals naturally prefer the same types of food.
C animals are influenced by what any other animals of the same species eat.
D a food type is more desirable because an animal views that food as scarce.

30 According to the writer, how is learning by observation and imitation a useful feature of the brain?

A It helps people overcome challenges.
B Positive models can influence social behaviour.
C It can give an advantage when communicating with others.
D Cultural norms and relationships can be understood more easily.

31 According to the writer, how does television advertising exploit the human tendency to imitate others?

A It shows buying behaviour that marketers want to encourage in viewers.
B It features people who have a desirable image.
C It shows older people whom teenagers admire.
D It features successful people endorsing products responsible for their success.

Questions 32–36

Do the following statements agree with the claims of the writer in Reading Passage 3?

In boxes 33–36 on your answer sheet, write

YES	*if the statement agrees with the claims of the writer*
NO	*if the statement contradicts the claims of the writer*
NOT GIVEN	*if it is impossible to say what the writer thinks about this*

32 The diamond campaign worked by making a connection in people's minds between diamonds and luxury.

33 People are more aware of visual marketing than auditory marketing.

34 The campaign advertising diamonds had a positive influence on society.

35 There is still some uncertainty about whether animals copy the behaviour of the most powerful animals among them.

36 Consumers make a logical connection between celebrities' achievements and the products they promote.

Questions 37-40

*Complete each sentence with the correct ending, **A-G**, below.*

*Write the correct letter, **A-G**, in boxes 37-40 on your answer sheet.*

37 The behaviour of the monkeys on the island of Koshima showed that

38 Primatologist Frans de Waal found that

39 Dick Fosbury is mentioned in order to show that

40 A feature of some modern marketing campaigns is that

A people imitated behaviour that was linked with success.
B younger animals of a certain species are more likely to imitate each other.
C an animal would imitate another that had higher status.
D imitation of popular sportspeople has occurred for many decades.
E products are marketed to potential consumers who are unaware that marketing is occurring.
F animals can develop new habits by observation.
G incentives are provided for consumers who behave in a certain way.

Marketing and mind control

单项选择 | Questions 27-31

答案 27 B / 28 A / 29 C / 30 A / 31 B

题 / 答案	题干及选项翻译	原文定位与翻译	推理与干扰项排除
27 **B**	**根据作者的说法，哪一种营销手段试图让消费者在商店里停留更长时间?** A 播放悦耳的音乐。 B 散发令人愉悦的香味。 C 展示吸引人的海报。 D 播放店内广播通知。	**第3段** More surreptitiously, our olfactory system is targeted by variations of vanilla and citrus perfumes aimed at enticing us to linger in a retail outlet. 译：更隐蔽的是，各种香草和柑橘香味会作用于我们的嗅觉系统，目的是吸引我们在零售商店里多停留一会儿。	**题干问的是“延长顾客停留时间”这一具体目的。aimed at 后面的内容直接交代目的。** linger＝逗留，对应 stay in a shop for longer；vanilla and citrus perfumes（香草和柑橘香味）对应 pleasant scents，故选B。 A：广播广告曲虽在文中出现，但没有与延长店内停留时间联系起来。C：海报属于视觉营销，文中未赋予其这一具体目的。D：未提店内广播；telemarketers 指电话营销人员。
28 **A**	**作者提到瓶装水，是为了说明：** A 消费者购买瓶装水，是因为它受到了营销推广。 B 尽管瓶装水没有味道，人们仍会购买它。 C 当营销活动有效时，营销人员就不必进行口味测试。 D 测试证明，人们无法区分瓶装水和自来水。	**第4段** It is difficult to measure how effective these campaigns are, but as in the 'A diamond is forever' campaign, they can be so successful that they change the fabric of our culture. 译：营销活动的效果很难衡量，但正如“钻石恒久远”的例子所示，它们可以非常成功，甚至改变我们的文化结构。 In the case of bottled water, we are swayed by advertising into paying for something that we can obtain for free. 译：以瓶装水为例，广告影响了我们，使我们花钱购买本来可以免费获得的东西。 Most people cannot distinguish bottled from tap water, much less between brands of bottled water, which is why you rarely hear of a bottled water company proposing a blind taste test. 译：大多数人无法区分瓶装水和自来水，更不用说区分不同品牌的瓶装水了；所以很少听说瓶装水公司提议进行盲测。	**举例目的要回到例子支持的观点：营销能影响人们的选择，甚至让人愿意为本可免费获得的东西付费。** be swayed by advertising into paying＝受广告影响而付钱，直接对应A。 B：难以区分两类水，不能推出瓶装水“没有味道”。C：“公司很少提出盲测”不等于“营销有效就不需要测试”，文中没有这一条件关系。 D：文中没有说测试已证明这一结论；“难以区分”只是支持广告影响力的细节，题目问的是举例所说明的观点。
29 **C**	**根据作者的说法，“通过社会互动传播的食物偏好”发生在以下哪种情况下?** A 只有群体中占支配地位的动物才会影响其他成员吃什么。 B 同一种类的动物天生偏好相同种类的食物。 C 动物受到其他同种动物所吃食物的影响。 D 动物认为某种食物稀缺，因此更想获得它。	**第5段** If we provide a lab rat with two types of cereal, it will consume approximately the same amount of each. 译：如果给一只实验鼠提供两种谷物，它吃掉的两种谷物的量会大致相同。 However, if we put that rat with another rat that spent its day eating just one type, when faced with a choice, our rat will now show a preference for the same type as the other rat was eating. 译：然而，如果把它与另一只当天一直只吃其中一种谷物的老鼠放在一起，再次面临选择时，实验鼠就会偏好另一只老鼠所吃的那种谷物。 Psychologists call this 'socially transmitted food preference'. 译：心理学家将此称为“通过社会互动传播的食物偏好”。	**前后变化：最初两种谷物吃得差不多；接触另一只只吃某种谷物的老鼠后，也开始偏好该谷物。** 因此，同种动物的进食情况影响了它的选择，选C。socially transmitted 强调偏好通过接触和互动传播。 A：只写了 another rat，没有要求对方占支配地位；only 缺乏依据。B：偏好是在接触后形成的，无法支持“天生偏好”。D：未涉及食物稀缺，也未说动物觉得它稀缺。
30 **A**	**通过观察和模仿进行学习，如何体现了大脑这一功能的实用价值?** A 帮助人们克服困难。 B 正面榜样能够影响社会行为。 C 使人在与他人交流时获得优势。 D 使人更容易理解文化规范和人际关系。	**第7段** Learning by observation can be an extraordinarily valuable brain feature. 译：通过观察进行学习，可以是大脑一项极有价值的功能。 This is how we learn to communicate and perform motor skills as well as deal with many everyday problems. 译：我们通过这种方式学会交流、掌握动作技能，并处理许多日常问题。 For example, a newcomer struggling to purchase tickets and navigate the subway system in a foreign city may step back to learn from the people nearby. 译：例如，一个初到外国城市的人，如果在购票和使用地铁系统时遇到困难，就可以先退到一旁，观察并学习附近的人如何操作。	**概括句和例子共同支持A：deal with many everyday problems 对应 overcome challenges。** 地铁例子的逻辑：不会买票、不会乘地铁→ 观察附近的人→ 学会操作→ 解决困难。 B：本段未讨论榜样是否“正面”。C：learn to communicate 是“学会交流”，没有明确表达“在交流时获得优势”。D：cultural transmission 指模仿学习形成的文化传递，不能据此推出更容易理解文化规范和人际关系。
31 **B**	**根据作者的说法，电视广告如何利用人类模仿他人的倾向?** A 展示营销人员希望观众采取的购买行为。 B 让形象令人向往的人出现在广告中。 C 展示青少年崇拜的年长者。 D 让成功人士为促成他们成功的产品代言。	**第8段** A component of advertising relies on the marketer's ability to tap into the brain's propensity for imitation. 译：广告发挥作用的一部分机制，依赖于营销人员利用大脑模仿倾向的能力。 Anybody who has watched TV knows advertisements are disproportionately populated with attractive, successful-looking individuals. 译：看过电视的人都知道，广告中外表有吸引力、看起来很成功的人所占比例格外高。 If we are going to imitate someone, we are more inclined to imitate those who appear to be popular and appealing. 译：如果要模仿某个人，我们更倾向于模仿那些看起来受欢迎、有魅力的人。	**人们更愿意模仿受欢迎、有魅力的人→ 广告大量呈现这种形象→ 利用模仿倾向影响观众。** attractive、successful-looking、popular and appealing 共同对应B中的 a desirable image（令人向往的形象）。 A：文中没有说广告必须展示这些人的购买行为。C：没有“年长者—青少年”的年龄关系。 D：products responsible for their success 指“促成他们成功的产品”。第10段明确说 their success did not depend on these products（他们的成功不依赖这些产品），故D的因果关系错误。

Marketing and mind control

作者观点判断 | Questions 32-36

答案 32 NO / 33 NOT GIVEN / 34 NOT GIVEN / 35 YES / 36 NO

题 / 答案	题干及选项翻译	原文定位与翻译	推理与干扰项排除
32 **NO**	**钻石营销活动通过在人们心中建立“钻石”与“奢华”之间的联系而发挥作用。**	**第2段** Rather than pushing a brand, the objective was to promote diamonds as the symbol of everlasting love. 译：这项活动的目标是将钻石推广为永恒爱情的象征，而非推销某个品牌。 This was achieved by exploiting the associative nature of the brain: associating neurons activated by the concept of 'love' with neurons that encoded the concept of 'diamonds'. 译：这一目标通过利用大脑的联想特性实现：把由“爱情”概念激活的神经元，与编码“钻石”概念的神经元联系起来。	**原文明确说明，这项活动建立的是 diamonds ↔ everlasting love（钻石与永恒爱情）的联系。** 题干把 love 换成 luxury（奢华），改变了原文明示的营销内容，因此判NO。 前文电影明星佩戴钻石的画面容易让人联想到奢华，但作者已经直接说明了宣传所服务的目标。这里判断的是文中这项活动如何发挥作用，不能用现实中钻石还可能象征什么来替代文章信息。
33 **NOT GIVEN**	**与听觉营销相比，人们更能意识到视觉营销的存在。**	**第3段** Our visual system is targeted by an avalanche of information on the internet, street posters, billboards and in movie theatres. 译：互联网上、街头海报上、广告牌上以及电影院里的大量信息，都以我们的视觉系统为目标。 Our auditory system submits to catchy radio jingles and telemarketers. 译：我们的听觉系统则受到朗朗上口的广播广告曲和电话营销人员的影响。 More surreptitiously, our olfactory system is targeted by variations of vanilla and citrus perfumes aimed at enticing us to linger in a retail outlet. 译：更隐蔽的是，各种香草和柑橘香味会作用于我们的嗅觉系统，目的是吸引我们在零售商店里多停留一会儿。	**题干增加了比较：人们对视觉营销的察觉程度，高于对听觉营销的察觉程度。原文没有提供这项比较。** an avalanche of information 强调信息量大；catchy 强调广告曲容易吸引注意、容易记住。两者都不能证明视觉营销更容易被识别为营销。 More surreptitiously（更隐蔽地）引出的是嗅觉营销，无法据此排列视觉营销与听觉营销的察觉程度。因此判NOT GIVEN。
34 **NOT GIVEN**	**钻石广告营销活动对社会产生了积极影响。**	**第4段** It is difficult to measure how effective these campaigns are, but as in the 'A diamond is forever' campaign, they can be so successful that they change the fabric of our culture. 译：营销活动的效果很难衡量，但正如“钻石恒久远”的例子所示，它们可以非常成功，甚至改变我们的文化结构。 **第2段** By 1941, diamond sales had increased by 55%. 译：到1941年，钻石销量已增长了55%。	**营销成功和社会受益，是两个不同的判断。销量增加、文化受到改变，说明推广有效、影响深远。** 题干中的 a positive influence on society 还要求作者评价这种改变给社会带来了好处；原文没有给出这一评价。successful 不能直接等同于 positive for society。 作者也没有明确评价这次钻石营销给社会带来了负面影响，因此无法判断其对社会的影响是积极还是消极，判NOT GIVEN。
35 **YES**	**动物是否会模仿群体中最有权势的成员，目前仍存在一些不确定性。**	**第9段** Although not all researchers are convinced by the findings, a number of studies indicate that some animals also imitate dominant members of their group. 译：尽管并非所有研究人员都信服这些研究结果，多项研究仍表明，一些动物也会模仿其群体中占支配地位的成员。	**原文包含两层信息：多项研究提供了支持，但这些发现尚未说服所有研究人员。题干概括了后一层保留态度。** not all researchers are convinced→ some uncertainty；imitate→ copy the behaviour；dominant members→ the most powerful animals among them。“有权势”在这里指群体中的支配地位。 有研究支持这一现象，与研究界仍有疑问可以同时成立。题干只说仍存在一些不确定性，因此判YES。
36 **NO**	**消费者在名人的成就与其推广的产品之间建立了合乎逻辑的联系。**	**第10段** Imitation is undoubtedly an invaluable ability, but often our propensity to imitate generalises indiscriminately, leading to poor decisions. 译：模仿无疑是一种极有价值的能力，但这种倾向常会不加区分地扩展，导致不明智的决定。 However, today, sportspeople appear in advertisements asking us to buy the laptops or sports drinks that they promote. 译：然而，如今运动员会出现在广告中，劝我们购买他们推广的笔记本电脑或运动饮料。 Rationally, we know these people's success did not depend on these products, so it seems our propensity to purchase products relates more to neural programs that evolved to encourage imitation of those further up the social ladder. 译：从理性上说，我们知道这些人的成功并不依赖这些产品。因此，购买产品的倾向似乎更多地与演化形成的神经机制有关；这些机制促使我们模仿社会地位更高的人。	**logical connection 指有合理依据的联系，例如某种训练方法确实有助于提高成绩，学习它就有与成功相关的理由。** 这里却缺少这一依据：原文明说，运动员的成功不依赖这些产品。消费者仍可能因模仿成功人士的倾向而购买，所以作者将其放在“不加区分地模仿、导致不明智决定”的讨论中。 Rationally, we know… 所表达的理性认识，是“这些产品没有促成他们成功”。它无法支持题干声称的合理联系，故判NO。

Marketing and mind control

句子结尾匹配 | Questions 37-40

答案 37 F / 38 C / 39 A / 40 E

题 / 答案	题干及选项翻译	原文定位与翻译	推理与干扰项排除
37 **F**	**Koshima岛上猴子的行为表明……** 接F：动物能够通过观察形成新的习惯。	**第6段** She began taking her dirt-covered sweet potatoes to the river to wash them before eating them. 译：她开始把沾满泥土的红薯带到河边，洗干净后再吃。 Upon seeing this, a few other open-minded monkeys picked up on the idea. 译：看到这一行为后，另外几只愿意接受新事物的猴子也学会了这个办法。 Potato washing then spread from monkey to monkey and, over the course of a few years, most monkeys were eating clean potatoes. 译：随后，清洗红薯的行为在猴子之间传播；几年后，大多数猴子都开始吃洗干净的红薯。 Humans are clearly not the only animals to engage in imitation and social learning. 译：显然，进行模仿和社会学习的动物并不只有人类。	**一只猴子洗红薯→ 其他猴子看到后学会→ 清洗红薯逐渐成为群体中的习惯。** Upon seeing this 对应 by observation；picked up on the idea 及此后持续清洗红薯，对应 develop new habits，故选F。 B：没有比较年轻与年长猴子的模仿倾向；open-minded 是愿意接受新事物，不能理解为年轻。 C：文中没有说最先洗红薯的猴子地位更高。
38 **C**	**灵长类动物学家Frans de Waal发现……** 接C：一只动物会模仿另一只地位更高的动物。	**第9段** Primatologist Frans de Waal provides anecdotal evidence of preferential imitation among chimpanzees. 译：灵长类动物学家Frans de Waal提供了黑猩猩存在选择性模仿的个案证据。 He noted that in one particular group the dominant male was hurt and was limping as a result. 译：他注意到，某个群体中占支配地位的雄性黑猩猩受了伤，因此走路一瘸一拐。 Soon juvenile males of the group started imitating his limp, a form of flattery that would have been unlikely if a non-dominant male had been injured. 译：不久，群体中的年轻雄性开始模仿他跛行；这是一种讨好行为。如果受伤的是不占支配地位的雄性，这种情况就不太可能出现。	**被模仿者的地位会影响他是否成为模仿对象：优势雄性跛行，年轻雄性学他；换成地位较低的雄性，同样的模仿很可能不会发生。** dominant male 对应 another that had higher status，故选C。跛行本身不带来成功或实用好处，这个例子强调地位的作用。 B：juvenile 确实表示年轻，但年轻雄性模仿的是优势雄性。each other 却表示年轻动物互相模仿，改变了模仿关系；原文也未作年龄间的可能性比较。
39 **A**	**文中提到Dick Fosbury，是为了说明……** 接A：人们模仿了与成功有关的行为。	**第10段** When athlete Dick Fosbury revolutionised the high jump by jumping over the bar backward in 1968, imitators obviously copied his jumping style, not his brand of sports shoes. 译：1968年，Dick Fosbury以背对横杆的方式跃过横杆，革新了跳高技术；模仿者显然学习的是他的跳高方式，而非他所穿运动鞋的品牌。 However, today, sportspeople appear in advertisements asking us to buy the laptops or sports drinks that they promote. 译：然而，如今运动员会出现在广告中，劝我们购买他们推广的笔记本电脑或运动饮料。	**跳高技术与运动表现有实际联系：Fosbury凭革新的跳法取得成功，人们学习他的跳法，故选A。** 随后文章转向现代代言：消费者购买运动员推广的产品，尽管产品没有促成他们成功。前后对照强调模仿内容与成功的关联。 D：1968只提供事件背景。只概括为“模仿运动员已有几十年”，会漏掉“跳法与鞋子品牌”的对照，也解释不了紧接着的现代代言讨论。
40 **E**	**一些现代营销活动的一个特点是……** 接E：产品被推广给潜在消费者，而消费者并未意识到营销正在发生。	**第11段** Today, companies engage in stealth marketing campaigns in which people are paid to frequent bars or websites to covertly promote certain products. 译：如今，公司会开展隐蔽营销活动：付钱雇人经常出入酒吧或访问网站，暗中推广某些产品。	**stealth marketing 是隐蔽营销，covertly promote 是暗中推广。潜在消费者可能把推广人员当作普通顾客或网站用户，在不知情时接触推荐，故选E。** G：people are paid to…promote certain products 表示受雇推广产品，拿钱的是推广人员。G把接受奖励的人换成消费者，原文没有提供这一信息。 frequent 在此为动词，表示经常去、常到访。

句尾选项 A-G｜英文与中文对照

A	people imitated behaviour that was linked with success.	人们模仿了与成功有关的行为。
B	younger animals of a certain species are more likely to imitate each other.	某个物种中较年轻的动物更有可能互相模仿。
C	an animal would imitate another that had higher status.	一只动物会模仿另一只地位更高的动物。
D	imitation of popular sportspeople has occurred for many decades.	模仿受欢迎运动员的现象已经存在了几十年。
E	products are marketed to potential consumers who are unaware that marketing is occurring.	产品被推广给潜在消费者，而消费者并未意识到营销正在发生。
F	animals can develop new habits by observation.	动物能够通过观察形成新的习惯。
G	incentives are provided for consumers who behave in a certain way.	采取某种行为的消费者会获得奖励或其他激励。
